

Circular No. AUS/89/19-20

30<sup>th</sup> January, 2020

Dear Parents,

**AUS feels proud!**

Two Robotics teams, one from the Secondary Boys' School and one Secondary Girls' School, have participated in the UAE wide First Lego League Competition that was held at the King's School – Al Barsha very recently. It is the first time that AUS has competed in this high-profile Robotics Competition. The judges were very impressed with our students' performance due to the fact that they have outperformed most other school teams that have been competing for many years already. Well done AUS! We are proud of you!

### **DSIB School Inspection**

Thank you to everyone for your support and understanding this week. It is dearly appreciated!

The school inspection team of eight inspectors visited AUS this week and asked me to thank everyone for their hospitality and support. Especially those who spent time with them during interviews.

The first impression we have from their informal feedback sessions, is that there is a lot of appreciation for the commitment and hard work that is noticeable around the school. The verbal feedback of the inspection team will be shared with the school management today, but has to be verified by KHDA according to the school inspection policy. We will notify you of any further news as soon as it is confirmed. Ratings will be published after the quality assurance procedures have been followed.

### **Corona Virus**

Schools have been advised by the Dubai Health Authority about the actions to be taken by schools after the recent reports on the threat of the Corona virus. Please refer to the message from our school doctor posted on School Portal.

Regards,

**Leonard Murphy**  
Principal
